A Busy November

30 November 2009: November marks the busiest month for the team to date

As November draws to a close, the team is reflecting on a busy month. We received six callouts in the month (compared to our normal average of two per month). Of these, five were in three days and three were in one day alone.

On that day, we received a callout at 0015 which one of our CFRs attended within 3 minutes (despite being called from his sleep). Two of the team's CFRs cleared the scene of our final call that day around 2115.

Of the six callouts in the month, we attended four. In the case of the other two, we simply didn't have any one of the three CFRs in Ettington at the time. As our team grows, we anticipate being able to respond to a higher-percentage of callouts.

During the month, we attended patients who ranged in age from 4 to over 90 and to patients with a wide-range of medical conditions.
